OVERVIEW

A results-driven **Quality Assurance Engineer** with **2+ years of hands-on experience** in software testing, test automation, and API validation within high-stakes banking and financial technology environments. Demonstrated expertise in building production-grade automation frameworks using **Appium, Maestro, and Rest-Assured**, with a strong foundation in **SDLC, STLC, Agile/Scrum** methodologies. Track record of **60%+ reduction in test execution time** through strategic script refactoring and reusable automation architecture. Passionate about elevating software quality through continuous improvement, meticulous defect analysis, and end-to-end test coverage. Committed to delivering reliable, scalable QA solutions that accelerate development cycles and protect production stability.

EDUCATION

B.Sc. Informatics Engineering Sep 2020 – Jan 2024
University of Brawijaya, Indonesia GPA: 3.78/4.00
Relevant Courses: Software Engineering, Computer Networks, Algorithms & Data Structures, Database Systems, Software Testing & Quality Assurance
Achievement: Top 5% of graduating cohort; maintained Dean's List-equivalent GPA throughout studies

WORKING EXPERIENCE

QA Automation Engineer Sep 2024 – Present
PT. Bank Negara Indonesia Tbk. (BNI), Indonesia

Lead automation engineering for **Wondr by BNI**, driving mobile and API test automation strategy to ensure platform reliability and accelerate release cycles.

Key Contributions & Achievements:

- **Mobile Automation Framework Development (Appium/Maestro):** Architected and implemented **100+ automated test cases** for mobile regression using Appium and Maestro frameworks. Engineered a modular, Page Object Model-based architecture enabling high test reusability across app versions. **Impact:** Drastically reduced manual regression effort, enabling same-day regression validation on sprint releases
- **API Regression Automation (Rest-Assured):** Developed and maintained a comprehensive REST API regression suite covering **10+ core banking features**. Refactored legacy scripts into dynamic, data-driven frameworks with parameterized test data management and response schema validation. **Impact:** **60% reduction in script execution time**; improved test maintainability and onboarding efficiency for new QA team members
- **CI/CD Integration & Quality Gates:** Integrated automated test suites with **Jenkins** pipelines to enforce quality gates on every build, enabling shift-left testing and early defect detection before code merge. **Impact:** Reduced feedback loop from days to hours, accelerating sprint velocity

Quality Assurance Engineer Feb 2024 – Sep 2024
PT. Bank Negara Indonesia Tbk. (BNI), Indonesia

Drove end-to-end quality assurance for **Wondr by BNI**, a high-traffic retail banking mobile application serving millions of users, ensuring platform stability and regulatory compliance across release cycles.

Key Contributions & Achievements:

- **Large-Scale Test Execution & Defect Management:** Designed and executed **700+ test cases** across Integration Testing (IT), Acceptance Testing (AT), and full regression cycles, maintaining comprehensive traceability matrices to ensure feature completeness and risk coverage. Identified, documented, and tracked **80+ defects** in collaboration with cross-functional development teams, achieving rapid resolution turnaround. **Impact:** Ensured zero critical-severity escapes to production on major release milestones
- **Test Documentation:** Created detailed test documentation aligned with user stories and Figma designs to ensure comprehensive coverage and clear traceability

Testing Specialist Intern – Custody & FA System Feb 2023 – Jun 2023
PT CIMB Niaga Tbk., Indonesia

Contributed to software quality assurance for two concurrent enterprise-grade **Custody and Treasury** financial system projects, gaining deep exposure to structured testing workflows in a regulated banking environment.

Key Contributions & Achievements:

- **Custody System Test Design:** Independently authored **50 comprehensive test scripts** (positive and negative scenarios) for the Custody project based on detailed System Design Documents (SDD), covering boundary conditions, data integrity checks, and functional edge cases. **Impact:** Delivered complete test coverage documentation adopted by the permanent QA team
- **Treasury System Integration & Acceptance Testing:** Executed **150 System Integration Tests (SIT)** for the Treasury project, validating end-to-end transaction flows and system interoperability. Evaluated and reviewed

200 User Acceptance Test (UAT) scripts across both projects, ensuring alignment with business requirements.

Impact: Contributed to on-schedule project delivery with zero major post-UAT defects

- **Test Case Matrix Development:** Independently designed a **Test Case Matrix** framework as an intern, providing structured traceability between requirements and test coverage – a deliverable later adopted into the team's standard QA workflow. **Impact:** Recognized for fast professional adaptation and proactive contribution beyond intern scope

Practicum Assistant – Computer Networking Course

Aug 2022 – Dec 2022

Faculty of Computer Science, University of Brawijaya, Indonesia

Selected by faculty to lead hands-on computer networking practicum sessions, demonstrating strong command of networking fundamentals and ability to communicate complex technical concepts clearly.

Key Contributions & Achievements:

- Facilitated laboratory practicum sessions for **2 classes of 70+ students**, covering network protocols, subnetting, routing, and packet analysis using Cisco Packet Tracer and Wireshark
- Designed and assessed practicum assignments aligned with course learning outcomes, providing detailed feedback to support student comprehension and skill development
- **Impact:** Achieved **100% passing rate** across both classes – highest recorded outcome for the practicum course in that semester

TECHNICAL SKILLS & COMPETENCIES

Test Automation Frameworks: Appium (Mobile Automation – Android/iOS), Maestro (Mobile UI Testing), Rest-Assured (API Automation), Cucumber (BDD/Gherkin), Selenium (Web UI)

API Testing & Integration: Postman (Manual & Automated Collections), REST API Testing, Response Validation, Schema Testing, Contract Testing, Environment-based Configuration

Programming & Scripting: Java (Primary), JavaScript, Oracle SQL – with hands-on application in automation scripting, data-driven test frameworks, and database query validation

CI/CD & DevOps Tools: Jenkins (Pipeline Integration, Quality Gates), Git (Version Control, Branch Management), Docker (Basic Containerization Awareness)

Test Management & Tracking: Jira (Bug Tracking, Sprint Management, Test Reporting), Test Case Design (Equivalence Partitioning, Boundary Value Analysis, Decision Tables)

Database, Search & Cache Systems: DBeaver, Oracle SQL, Redis, Elasticsearch – for backend validation, data integrity checks, search index verification, and cache state verification in test scenarios

Development Environments: IntelliJ IDEA, VS Code, Postman, Git CLI

Methodologies & Frameworks: Agile/Scrum, SDLC, STLC, Shift-Left Testing, Risk-Based Testing, Regression Testing Strategy, Black-Box & Gray-Box Testing

Soft Skills: Analytical Problem-Solving, Cross-functional Collaboration, Technical Documentation, Attention to Detail, Adaptability in Fast-Paced Environments

LEADERSHIP & ORGANIZATIONAL EXPERIENCE

Head of Advocacy & Student Welfare

Feb 2022 – Dec 2022

EMIF FILKOM UB – Student Executive Board, Faculty of Computer Science

- Led a division of **7 staff members**, overseeing the planning, execution, and evaluation of **5 strategic work programs** serving 200+ informatics engineering students
- Acted as primary liaison between the student body and faculty administration, resolving academic and non-academic concerns with diplomatic effectiveness
- Conducted performance evaluations and provided mentorship to staff, fostering accountability and professional growth within the team

Staff – Advocacy & Student Welfare

Mar 2021 – Jan 2022

EMIF FILKOM UB – Student Executive Board, Faculty of Computer Science

- Managed the **Course Registration (KRS) Crisis Centre** and Short-Semester (SP) programs, providing real-time information dissemination and resolution support for scheduling conflicts and class availability issues affecting hundreds of students

Staff Advisor – New Student Orientation

Jun 2021 – Nov 2021

IF ELSE FILKOM UB

- Mentored **16 incoming students** through the department orientation program, leading weekly mentoring sessions and providing academic and social integration guidance

Vice Chairman – Public Relations Division

Oct 2020 – Nov 2020

APPTICS, Faculty of Computer Science

- Assisted the division head in leading the team; successfully executed information dissemination for the faculty inauguration night, engaging **300+ audience members**

CERTIFICATIONS

- **ISTQB Foundation Level (CTFL)** – International Software Testing Qualifications Board, via Udemy *Apr 2025*
- **Foundations of User Experience (UX) Design** – Google / Coursera *Oct 2023*
